

Jr. Water Consultant

Job Location – Visalia, CA

Jr. Water Consultant Responsibilities

4Creeks is seeking a Jr. Water Consultant to work under the direction of a Project Engineer or Manager on our Water team. Responsibilities for this position would include preparing technical reports, performing technical analysis (calculations, water modelling, etc.), and developing solutions for water quality and water quantity programs. Other responsibilities include supporting client relations, water rights strategy, regulatory compliance, grant writing, site visits and documentation of site conditions for typical civil engineering projects. This position will primarily entail office work.

Minimum Qualifications

1. The position requires a B.S. Environmental Engineering, Civil Engineering, or related field.
2. Minimum of 0-1 years of experience.
3. The ideal candidate will have working knowledge of California water issues, regulatory programs, water solution design principles, and exceptional written and oral communication skills. Bonus points for having an Engineer-In-Training Certificate.
4. Experience with Microsoft Office, including Word and Excel is required.

Compensation

Salary will be determined by candidate's skill and experience level and highly competitive with industry standards. Benefits package includes full employee health coverage (50% coverage for dependents), company 401(k) contribution, and performance bonuses.

About 4Creeks

We are a small band of visionaries, mentors, and citizens, driven by a deeply instilled belief that together we can help solve some of the challenges we face. We're determined to play our part in inspiring a new future and rebuilding what's broken, from Bakersfield to Sacramento. We call Central California home and we're committed to using all the tools and resources at our disposal to make this region known for greatness.

You'll quickly find out that 4Creeks is built on a fun, challenging and collaborative work-environment. A team-based approach is the standard we uphold, and we believe that no one person is more valuable than the other. We enjoy working together and pooling our resources to provide the best solution we can create together.

The Water team provides technical and administrative assistance to local irrigation districts, landowners, and Groundwater Sustainability Agencies (GSA's). We help manage one of our most precious resources, water, through solutions in water quality, quantity, access, and sustainability.

How to Apply

For immediate consideration; please email your resume and cover letter detailing your background, skills, and experience to hr@4-creeks.com. Our Human Resource Administrator will contact you promptly for initial interview coordination.
