

Construction Inspector

Job Location – Central Valley (various)

Responsibilities

4Creeks is seeking a Construction Inspector to work under the direction of a Project Engineer or Manager on our Agriculture team. Responsibilities for this position would include inspecting construction activities for Anaerobic Digesters and Process water Pond liners, earthwork and liner placement, tracking all testing related to each phase of the project, coordinating with contractors, preparing daily reports, and preparing final CQA (construction quality assurance) report. Job sites are located throughout the Central Valley (Bakersfield, Tulare, Visalia, Hilmar, etc.).

This is a full time, temporary position from June to September, with the end date dependent on construction schedules and the possibility of permanent full-time employment for stellar performance.

Minimum Qualifications

1. Valid driver's license and ability to drive to job sites throughout California
2. Minimum of 0-1 years of experience.
3. The ideal candidate will have working knowledge in preparation of plans, ability to read construction plans and related documents, exceptional written and oral communication skills, and understanding of construction processes. Bonus points for construction background and/or experience with construction inspections.
4. Experience with Microsoft Office, including Word and Excel is required.

Compensation

Salary will be determined by candidate's skill and experience level and highly competitive with industry standards. Benefits package includes full employee health coverage (50% coverage for dependents), company 401(k) contribution, and performance bonuses.

About 4Creeks

We are a small band of visionaries, mentors, and citizens, driven by a deeply instilled belief that together we can help solve some of the challenges we face. We're determined to play our part in inspiring a new future and rebuilding what's broken, from Bakersfield to Sacramento. We call Central California home and we're committed to using all the tools and resources at our disposal to make this region known for greatness.

You'll quickly find out that 4Creeks is built on a fun, challenging and collaborative work-environment. A team-based approach is the standard we uphold, and we believe that no one person is more valuable than the other. We enjoy working together and pooling our resources to provide the best solution we can create together.

The Agriculture team designs methane digesters for dairies, agricultural facility improvements, and provides technical assistance for regulatory compliance.

How to Apply

For immediate consideration; please email your resume and cover letter detailing your background, skills, and experience to hr@4-creeks.com. Our Human Resource Administrator will contact you promptly for initial interview coordination.
