

Traffic Engineer-in-Training

Job Location – Visalia, CA

Engineering-in-Training Responsibilities

4Creeks is seeking an Engineer-in-Training to work under the direction of a Project Engineer or Manager on our Public Works team. Focus would be on our traffic/transportation planning and engineering design projects. Responsibilities for this position would include preparing engineering technical reports, exhibits, calculations, and construction plans and estimates. Other responsibilities may include drafting topographic surveys, technical specification writing, site visits, and documentation of site conditions for typical traffic and civil engineering projects. This position will primarily entail office work.

Minimum Qualifications

1. The position requires a B.S. in Civil Engineering or related field. Emphasis in transportation engineering is a plus.
2. Minimum of 0-1 years of experience.
3. The ideal candidate will have working knowledge in preparation of plans, engineering design for various traffic and civil engineering projects, an Engineer-In-Training Certificate, and exceptional written and oral communication skills. Bonus points for experience and/or interest in traffic/transportation planning and engineering and/or local government.
4. Experience using AutoCAD is preferred (version 2009 or higher, Civil 3D preferred).
5. Experience with Microsoft Office, including Word and Excel, is required.

Compensation

Salary will be determined by candidate's skills and experience level and is highly competitive with industry standards. Benefits package includes full employee health coverage (50% coverage for dependents), company 401(k) contribution, and performance bonuses.

About 4Creeks

We are a small band of visionaries, mentors, and citizens, driven by a deeply instilled belief that together we can help solve some of the challenges we face. We're determined to play our part in inspiring a new future and rebuilding what's broken, from Bakersfield to Sacramento. We call Central California home and we're committed to using all the tools and resources at our disposal to make this region known for greatness.

You'll quickly find out that 4Creeks is built on a fun, challenging, and collaborative work environment. A team-based approach is the standard we uphold, and we believe that no one person is more valuable than the other. We enjoy working together and pooling our resources to provide the best solution we can create together.

The Public Works team supports our local municipalities designing street improvements, pedestrian and bicycle facilities, traffic signal systems, signing and pavement delineation, public utilities, and school improvements.

How to Apply

For immediate consideration, please email your resume and cover letter detailing your background, skills, and experience to hr@4-creeks.com. Our Human Resource Administrator will contact you promptly for initial interview coordination.
